Kep/Hon Gai Rail Line Under Construction, North Vietnam

25X1D Construction of the Kep/Hon Gai Rail Line continues to progress rapidly. There has been a 60 percent increase in railbed construction since [REDACTED] (see Summary No. 66), and the initial construction of numerous components is now discernible. The rail line will be 56 nm long when completed and will extend from a junction with the Ha Noi/Ping-Hsiang Rail Line at 21-20-45N 106-15-40E (Figure 1), 3.8 nm south of Kep, to the vicinity of a currently existing finger pier on the northeast coast of the Ile aux Buissons at 20-58-35N 107-03-03E (Figure 10). Approximately 44 nm of the railbed is in various stages of construction, ranging from initial draining to final grading.

Extensive earth moving is underway at the site of a probable railyard under construction at 21-01-38N 106-48-15E, 1 nm east of Uong Bi (Figure 7). Route 18 has been realigned to circumvent the area.

Three probable passing tracks/yards are under construction at 21-05-40N 106-32-15E (Figure 3), 21-03-35N 106-36-35E (Figure 4) and 21-02-00N 106-45-25E. Spurs are under construction at 21-13-40E 107-22-30E (Figure 2) and 21-03-34N 106-36-49E (Figure 4), extending east and north from the main line, respectively.

A single pier is under construction at 1 major and 15 minor bridge sites (see Figures 3 and 5). At least 8 major and 31 minor additional bridges/bridge systems will be required for completion of the line.

A dual junction with the meter gauge rail line which extends from a river port on the Song Da Bach to the coal mines at Vanh Danh is under construction at 21-01-50N 106-46-45E (Figure 6).

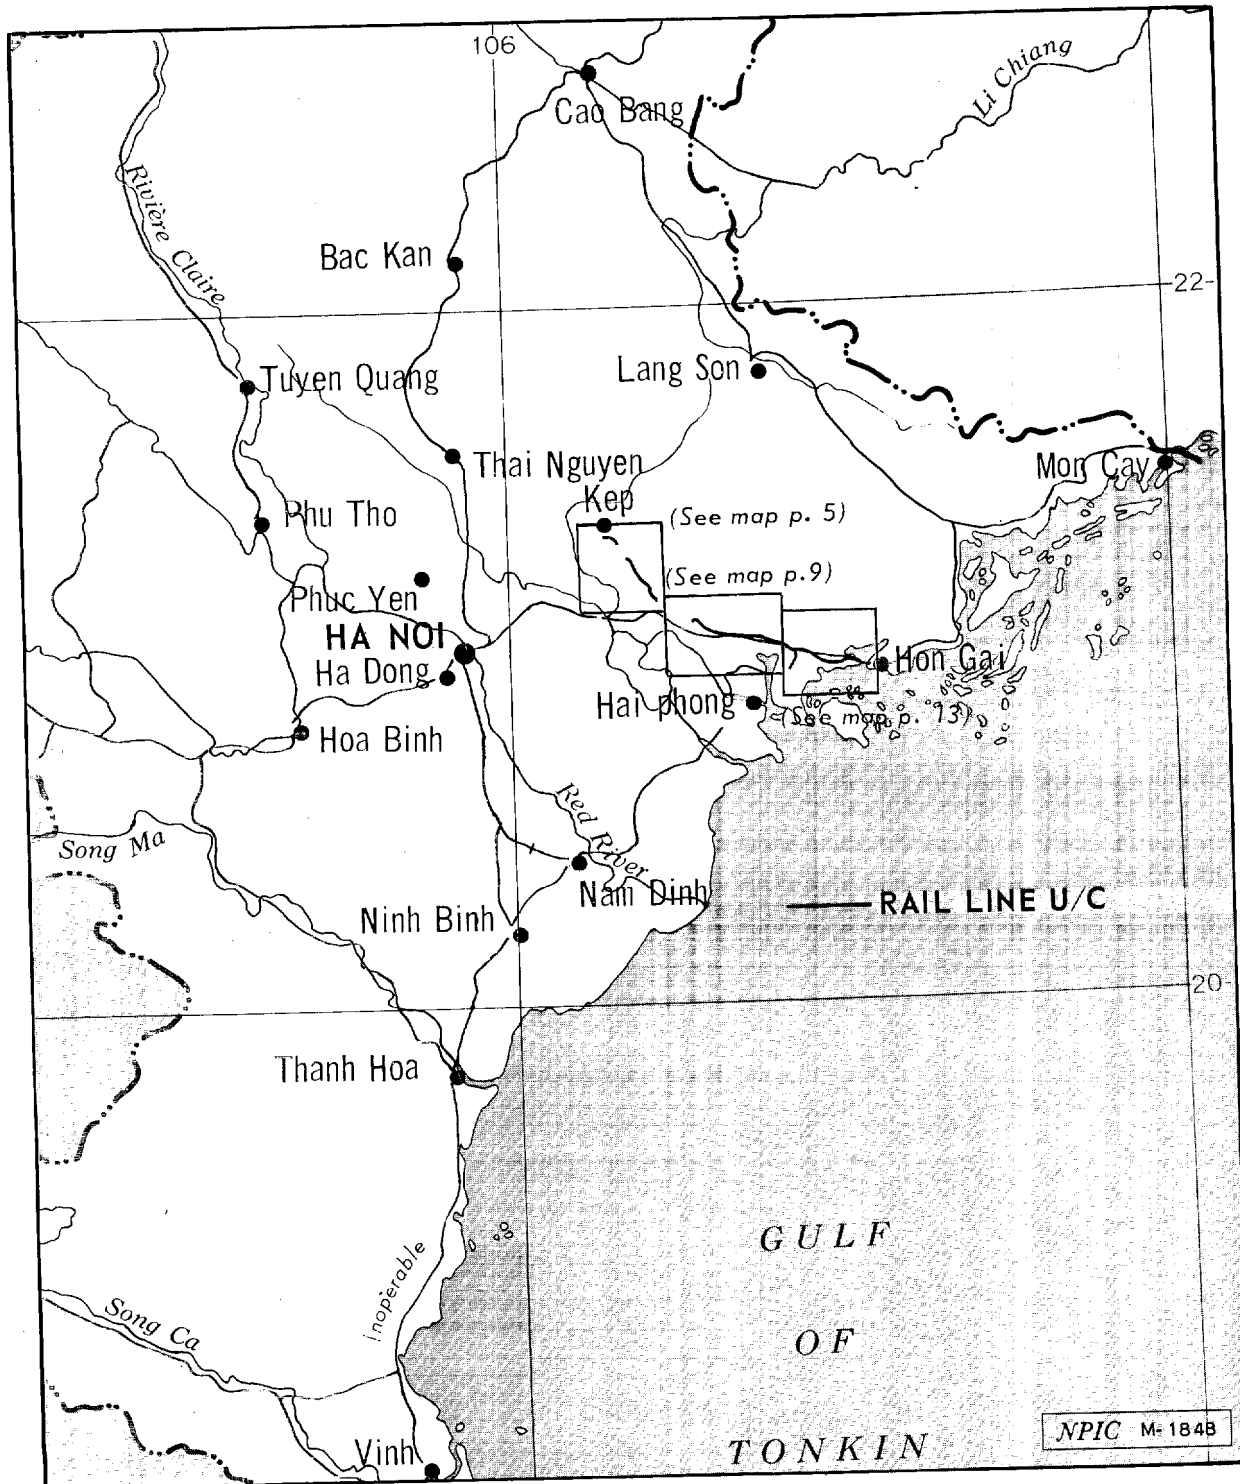

Representative segments of the rail line construction, not referenced above, are depicted in Figures 8 and 9.
